**Goldfinger's NIST FIPS
201-Certified CAC/PIV Solutions**

Data security is crucial for enterprises and government entities in today's digital world. This is where Common Access Cards (CACs) and Personal Identification Verification (PIV) cards come in.

Goldfinger offers a NIST FIPS 201-Certified CAC/PIV Solution for Atlassian, safeguarding data with robust security. This solution grants access solely to authorized users, managing intricate permissions. It ensures secure, encrypted identity access to the system and controlled spaces, elevating security with the CAC/PIV authenticator for Atlassian products.

Key Features

- Installs via UPM and Data Center Compatible**
 - Simplifies installation via Atlassian's UPM.
 - Version 3.x and above is also Data Center compatible.
- Follows Industry Best Security Practices**
 - Adheres to NIST SP 800-53 (REV 4) guidelines and STIG compliance
 - Ensures a secure experience with the authenticator plugin.
- Certificate of Networkiness (CoN)**
 - CAC/PIV Authenticator comes with a CoN for the Atlassian suite.
- Easy Implementation and Sign-On**
 - Easily integrates into the current environment and infrastructure.
 - Grants users quick and easy sign-on options.
- Advanced Compatibility**
 - Provides access to all supported applications at once
 - Easily customizes accessibility to applications with permissions.
- Supports CAC cards**
 - Supports US Government and NATO Common Access Card (CAC) and PIV cards.

Testimonial

The CAC/PIV authenticator for Atlassian has allowed us the ability to take advantage of the Atlassian tool set in our organization. Our organization requires use of cac for authentication to access cloud based systems and the CAC/PIV authenticator by Goldfinger Holdings, Inc. has made this possible. We haven't reported any errors or issues with this add-on. — **Latrece Porcher**

Value Proposition

Unlock Unparalleled Security and Efficiency with Goldfinger's CAC/PIV Authenticator for Atlassian Suite

Experience a transformative shift in your Atlassian access management with our CAC/PIV Single Sign-On (SSO) solution. Here's how we redefine your security landscape.

Effortless Security Integration

Customized Application Access, CoN Compliant

Secure Atlassian Logins for Govt. and NATO Users

Seamless Single Sign-On for Enhanced Efficiency

Atlassian Supported Products Integration
